Northbridge Lettings

Checkout inspection report

Records the checkout condition and cleanliness of Flat 2, 172 Alder Lane, Bellmere, ZZ3 1ZZ, including defects and photographs. The report provides the basis for the cleaning request covering vacuuming and light cleaning of the living space and limescale removal in the en-suite.

Report title: Check Out. Appointment date: 23 June 2026. Assessor: Northbridge Lettings.

The report describes the property room by room and records condition, cleanliness, defects and photographs. It states that an element or item without an assessor comment is taken to be in good, clean, serviceable condition and without defects.

The report is based on a visual inspection. Inaccessible and loft areas are not inspected. Fixtures and fittings may be listed without testing their working condition. The report does not necessarily identify structural defects or advise on repairs or their costs.

Guidance notes state that the property and contents are expected to be left in a similar condition and state of cleanliness to the report prepared before the tenancy. Cleaning should be thorough and the property left tidy.

The report says that smoke and carbon monoxide alarms will have been checked and will be in working order as of the report date; tenants are responsible for keeping them in working order and reporting faults other than battery replacement.

Checklist: no entries shown. Notes: no comments shown. Keys: no details or comments shown. External areas: Not applicable.

Assessor declaration: “I confirm that this report reflects my assessment of the property.” Signature received: 24 October 2025, 11:01:09.

Items (cleanliness)	Poor	Light cleaning required (see 'issues' and photo's)
Items (cleanliness)	Unacceptable	Professional cleaning required (see 'issues' and photo's)

Observations

- The report compares a previous inspection dated 15 August 2025 with the current inspection dated 23 June 2026.
- The current living space is rated Fair for condition and Poor for cleanliness. The carpet requires vacuuming, the windowsill is dusty and dirty, and a light clean is required.

- The current en-suite is rated Poor for condition and Poor for cleanliness. The shower area, facing and tap require limescale cleaning; the report also records a failed pop-up plug mechanism and flaking paint.
- Electricity is listed as all-inclusive, with no meter reading required, in both the previous and current report.
- Smoke detectors are marked tested in both reports, with the comment “Tested centrally by building maintenance.”
- The current report summary records 35 photographs for the living space and 19 for the en-suite. The previous report summary records 32 and 24 photographs respectively.
- Tenant comments are recorded as 0 in the previous report; the current report shows no tenant comments.

Findings

- Living space, previous report: Good condition and Good cleanliness. The grey fitted carpet and cream walls were described as in good clean condition, with some small marks in various locations. The UPVC window and blinds were in good clean condition and operated as expected. The TV was firmly wall-fitted and accompanied by a remote. The wardrobe was in fair condition and operated as expected. Sockets, switches, bed, mattress and suspended ceiling were described as in good clean condition; lighting worked as expected. “Wall defects” was also recorded.
- Living space, current report: Fair condition and Poor cleanliness. The report states: “As per inventory with following defects, Carpet requires vacuum Windowsill dusty and dirty Carpet requires vacuum Light clean required”.
- En-suite, previous report: Good condition and Good cleanliness. The white painted door, UPVC window, cream painted walls, plastic-clad walls, shower tray, lino and flooring, sink and tap, and close-coupled WC were described as in good clean condition. The ceiling had a small area of peeling paint; the light fitting worked intermittently, possibly due to too much light in the room at the time of inventory. Shower equipment was described as brand-new and free of limescale. The shelving unit had dents to the edge; tiles were in good clean condition. “Dented shelf” and “Peeling paint” were noted.
- En-suite, current report: Poor condition and Poor cleanliness. The door was in fair condition, the ceiling had flaking paint, the shower area required cleaning for limescale, and the flooring was in fair condition. The report also states: “Facing and tap required for limescale toilet condition.”
- The current report summary lists living-space defects as “Carpet requires vacuum” and “Light clean required”; en-suite defects are “Limescale”, “Failed pop-up plug mechanism” and “Flaking paint”.
- The declaration identifies Northbridge Lettings as assessor. No assessor email is included in this extraction.

Conclusions

- The checkout report identifies vacuuming and light cleaning as required in the living space, and limescale removal as required in the en-suite.
- The report also records condition issues that are distinct from the cleaning items: a failed en-suite pop-up plug mechanism and flaking paint.

Image evidence

Neutral image placeholder

Cover photograph: a numbered room plaque identifies the inspected room; it is not a condition or cleaning photograph.

Neutral image placeholder

Detector photograph in the previous-report section: shows a ceiling-mounted detector. The report records detectors tested centrally by building maintenance.

Neutral image placeholder

Previous living-space photographs (32): general overview photographs documenting the room and its contents as a reference for the earlier condition. Images marked “Wall defects” identify wall defects.

Neutral image placeholder

Current living-space photographs (35): general overview photographs document the room, furnishings, window, blinds and floor. One image is captioned “Carpet requires vacuum”; two images are captioned “Light clean required.” The inspection text also records a dusty and dirty windowsill.

Neutral image placeholder

Previous en-suite photographs (24): general overview photographs document the en-suite and fittings as a reference for the earlier condition. Images labelled “Dented shelf” show the shelving defect; an image labelled “Peeling paint” records the paint issue.

Neutral image placeholder

Current en-suite photographs (19): general overview photographs document the shower area, sanitary fittings and surfaces. Five images are labelled “Limescale,” one is labelled “Failed pop-up plug mechanism,” and one is labelled “Flaking paint.” These captions correspond to the defects recorded in the report.
